Dinosaur Yoga Poses for Kids

Deinonychus was the model for the " raptor" dinosaurs of the motion picture Jurassic Park (1993). The name raptor has come to apply to dromaeosaurs in general as a contraction for Velociraptor, a genus of dromaeosaur that was considerably smaller than Deinonychus.However, the term raptor (from the Greek word for "seize" or "grab") is more correctly applied to birds such as hawks ...

Stegosaurus, one of the various plated dinosaurs (Stegosauria) of the Late Jurassic Period (159 million to 144 million years ago) recognizable by its spiked tail and series of large triangular bony plates along the back. The forelimbs were much shorter than the hind limbs, which gave the back an arched appearance.

Amazon.com: dinosaurs

Dinosaurs – literally, the 'terrible lizards' – were first recognized by science, and named by Sir Richard Owen (who preferred the translation 'fearfully great'), in the 1840's. In the intervening 170 years our knowledge of dinosaurs, including whether they all really died out 65 million years ago, has changed dramatically.

References to Wikipedia in popular culture have been widespread. Many parody Wikipedia's openness, with individuals vandalizing or modifying articles in nonconstructive ways. Others feature individuals using Wikipedia as a reference work, or positively comparing their intelligence to Wikipedia.In some cases, Wikipedia is not used as an encyclopedia at all, but instead serves more as a ...
