Stanford's Ophthalmic Pathology Service offers consultative opinions on challenging cases submitted from outside of the Stanford network. These consultations can be utilized to offer expert opinion, answer specific questions or confirm diagnosis.

Ophthalmic Pathology

A total of 8 patients (8 eyes) diagnosed with ocular dirofilariasis were included in this study. All cases were clinically examined (including slit-lamp and fundus examination) by a uveitis expert. All cases were positively identified via microbiological and/or histopathological studies of the parasite, by both a veterinarian and a pathologist.
