The graphical user interface of Questasim consists of a "main" Questasim window that hosts several of subwindows, called panes. A pane can be manipulated by clicking on the controls at its right:

- One can zoom (maximize) a pane using the "plus" symbol and restore its original size using the "minus" symbol.

Concise Manual for the Modelsim/Questasim VHDL Simulator

Questa spans the levels of abstraction required for complex SoC and FPGA design and verification from TLM (Transaction Level Modeling) through RTL, gates, and transistors and has superior support of multiple verification methodologies including Assertion Based Verification (ABV), the Open Verification Methodology (OVM) and the Universal Verification Methodology
