The most common form of land recycling is the redevelopment of abandoned or unused building properties. Adaptive building is the development of an old abandoned building to repurpose it into a new building design and/or new purpose.

Land recycling - Wikipedia

Recycling literally means to reuse the items that have already been used once. It implies reprocessing the used materials to prevent waste generated by household or industrial dumping. Recycling helps in lowering the greenhouse gas emissions and landfilling. Landfilling is the oldest and the most crude way of disposing waste.

How Does Recycling Affect the Environment? The Good and ...

But if recycling is a moral imperative, and the goal is zero waste, not optimal waste, the result can be a net waste of the very resources that recycling was implemented to conserve. In what follows, I will illustrate the problems with each of the two central fallacies of mandatory and pure-market recycling, and then will turn to the problem of ...
