SPM Instrument Shock Pulse Tester T2000 With Manual Shape ...

The T2000 Series of vibration test systems is designed to meet the ever-changing challenges of today's moderate to extreme level test requirements. The T2000 Series is used by many different industries with a proven track record of unmatched and as yet unchallenged performance and long term reliability.

Model T2000 - Vibration Test Equipment

Shock pulse monitoring. SPM is an abbreviation for the Shock Pulse Method, which is a patented technique for using signals from rolling element bearings as the basis for efficient condition monitoring of machines. Instant evaluation of bearing condition is given in an easily understood green-yellow-red color scheme.

Shock pulse monitoring - SPM Instrument

At low test levels and for most shock tests, the blower spins at a significantly reduced rate (if at all), providing a large reduction in power consumption, acoustic noise and air volume extracted from the lab area. Power Amplifiers. T4000/T5000/T5500 Series systems utilize high efficiency SAI Series class D power amplifiers.

Model T4000 / T5000 / T5500 - Vibration Test Equipment

SPM is an abbreviation for the Shock Pulse Method, which is a patented technique for using signals from rotating rolling bearings as the basis for efficient condition monitoring of machines. From the innovation of the method in 1969 it has now been further developed and broadened and is now a worldwide accepted philosophy for condition ...
