In fact, many waves you observe are periodic oscillations. This means that they repeat every period and move about a fixed location or axis. However, many signals you commonly use—such as radio, sound, and light pulses—aren't periodic, but they can be built from periodic waves! In fact, this is the basis of modern communication.

Now even if you ignore this particle aspect of light, if you just look at the wave aspect of the light, it's still fascinating. Because most waves require a medium to travel through. So for example, if I think about how sound travels through air-- so let me draw a bunch of air particles. I'll draw a sound wave traveling through the air particles.
